PERSUASIVE TEXTS - 3M

Cats are better than dogs.

A cat and a dog are a pet that has four legs. I strongly agree with the title. Cats are better than dogs. Here are my reasons why.

Firstly you don't have to buy cat food because they go out hunting. I have a cat and it always goes hunting and when it comes back it has a mouse in its mouth.

Secondly cats come in better colours. Dogs only come in the colours black, white and brown. Cats come in ginger, brown/white, black/white and brown/black.

Thirdly dogs are more expensive than cats. So don't waste your money on a dog when you can buy a cat for less and use the extra money to get all the cat accessories you need. **YOU can't BEAT THAT!**

So remember cats feed themselves, cats come in better colours and dogs are more expensive. So don't miss out, go get a cat!

Forests are large leafy places covered in trees, plants and wild-life. I think that we need to keep a balance between our cities and forests. Here are my reasons why.

Firstly, it is vital to keep trees and plants healthy and alive because they keep our oxygen clear and bacteria free for us to breathe. So think of it as an exchange, if we keep them alive they will keep us alive!

Secondly, our cars, trucks, vans and golf carts release pollution into the air. Pollution kills trees and plants. Forests are needed to keep our countries interesting and beautiful and give us a place to exercise to make our bones stronger.

Last of all animals need wild berries and other fruits to survive.

If we don't keep our plants happy and healthy we won't have any animals to play with or look at!

So I think we should keep our plants alive because we would be able to breathe good oxygen, be strong and keep our environment alive. So follow these three things and we will be the best planet in our universe!
